DHY

Diamond Hands Yield

Whitepaper

Version 1.0

https://dhy.cash/

1. Introduction

1.1 Overview

Diamond Hands Yield ($DHY) is a first-of-its-kind **passive income protocol on Solana** that rewards long-term holders with **automatic USDT payouts.** Unlike traditional staking models, DHY ensures that **only short to long term holders get paid**, while sellers and new buyers fund the reward pools. This mechanism incentivizes long-term holding and creates a sustainable ecosystem for passive income generation.

1.2 Vision & Mission

Our mission is to **redefine yield farming** by rewarding diamond hands and punishing paper hands. By introducing a sustainable tax-based reward distribution system, $DHY creates a **zero-effort passive income stream** for holders while ensuring continuous liquidity and token sustainability.

2. How It Works

2.1 Tax-Based Reward System

Every transaction (buy/sell) incurs a 6% tax, which is automatically distributed into three separate reward pools:

2H Pool (10%) → Rewards distributed every 2 hours to holders who held for 2+ hours.

6H Pool (25%) → Rewards distributed every 6 hours to holders who held for 6+ hours.

24H Pool (65%) → Rewards distributed every 24 hours to holders who held for 24+ hours.

💎 **The longer you hold, the more you earn.** 💎

2.2 Reward Distribution Mechanics

At the end of each **epoch (2H, 6H, 24H)**:

1. Tax is collected from buys & sells.
2. Wallets that meet the holding criteria become eligible for payouts.
3. Rewards are distributed proportionally based on DHY holdings compared to total eligible holdings.
4. USDT is automatically sent to qualifying wallets—no staking, no claiming required.

Sellers forfeit rewards, making their exit liquidity for holders.

3. TOKENOMICS

Token Name:
Diamond Hands Yield

Token Symbol:
DHY

Total Supply:
1,000,000,000 DHY

Transaction Tax:
6% (Buy/Sell)

Tax Distribution:

- 10% → 2H Pool
- 25% → 6H Pool
- 65% → 24H Pool

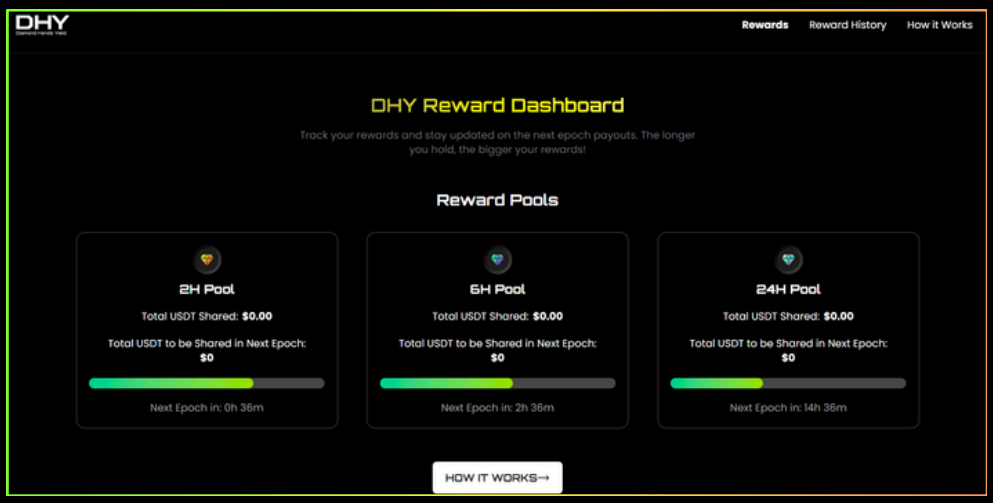

Initial Liquidity:
100%

No staking, no farming—just automated passive income.

4. DHY MVP Dapp

4.1 Features at Launch

- 💎 Track rewards accumulated in each pool
- 💎 View total rewards distributed across all pools
- 💎 See real-time updates on pending payouts

4.2 Post-Launch Upgrades

🚀 **Wallet Summary**

View **total DHY holdings, pending rewards, & qualification status**

📜 **Reward History**

Log of **past payouts** with detailed breakdowns

🏆 **Leaderboard**

Track **top holders & biggest earners** 💎

5. The Shill & Earn Dapp

💰 Earn $5 USDT just by tweeting your rewards!

1. Connect your wallet & Twitter
2. The system generates a personalized tweet based on your DHY earnings
3. Post the tweet & verify it
4. Claim $5 USDT after verification
5. 24-hour cooldown before you can shill again

🔥 This drives organic marketing & viral growth for DHY

6. Roadmap

Phase 1 :

- Token Launch
- MVP Dapp Launch
- Community growth & KOL onboarding
- First reward distributions

Phase 2 :

- UI upgrades (wallet summary, leaderboard, reward history)
- Partnership announcements
- First major exchange listing

Phase 3 :

- Shill & Earn Dapp release
- Governance & ecosystem expansion
- Long-term staking & reward optimization

7. Conclusion

$DHY is not just another token—it's a sustainable passive income protocol designed for true diamond hands.

Ready to print USDT/USDC just by holding?
